 *Indicates logo/branded options are available for that mat

Proper mat selection, placement and maintenance are keys to making your facility floors *safer, cleaner, and more comfortable* – which is our mission. The products in this document are general options based on hypothetical facilities in a generic facility category. For the most appropriate product recommendations, please request a site survey from your distributor sales representative or an M+A Matting representative. **A trained facility surveyor can make the best, safest mat recommendations tailored to your facility's/environment's specific flooring needs.**

Please note that the backing thickness and backing tread selection are as important as the mat selected, and M+A Matting representatives can help you specifically in this area. Please don't hesitate to reach out to us directly with questions. 706-756-5500 • products@mamatting.com.
