

Cushion Select vs. PVC Foam

Nitrile/PVC-blended foam

PVC foam

Durable diamond pattern surface

Ribbed surface (prone to peeling & shaving)

5/8" thickness

3/8" thickness

Excellent anti-fatigue properties

Minimal anti-fatigue properties

Typically lasts 2-3 years

Typically lasts 1 year

100% customer satisfaction guaranteed

1-year warranty

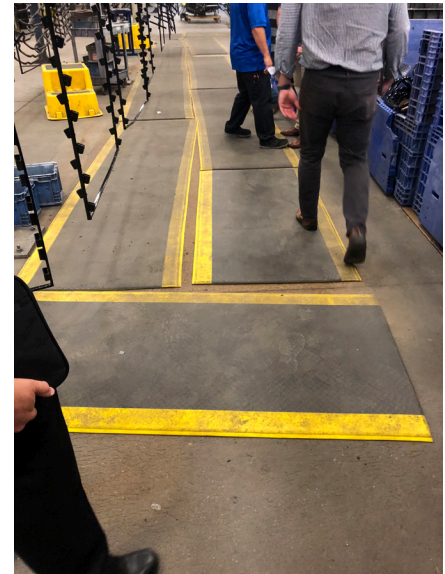

Do your PVC mats look like this?

PVC mats are prone to peeling and shaving, and because they are lightweight it's not unusual to see them taped at the border to prevent movement.

Because PVC compresses quickly, it's not unusual to see PVC mats stacked, but this can be unsafe.

Placing mats side-by-side rather than using a properly-sized runner can create tripping hazards.
